

Competitive Advantages

- **Modular Cage System** that facilitates the assembly process.
- **Structural Support and Reinforced Trough Supports** every 2' (0.60mt) on every tier.
- Feeder Troughs manufactured with **Galvanized Steel GA20**.
- With **wire cage partitions** that allow **air to flow freely** throughout the house without obstructions.
- All power units are direct drive “**coupled motors and gearboxes**”, without belts or need for maintenance.
- **Feeder and drinker systems adjustable to the growing size of the pullets, facilitating access during the entire pullet period.**

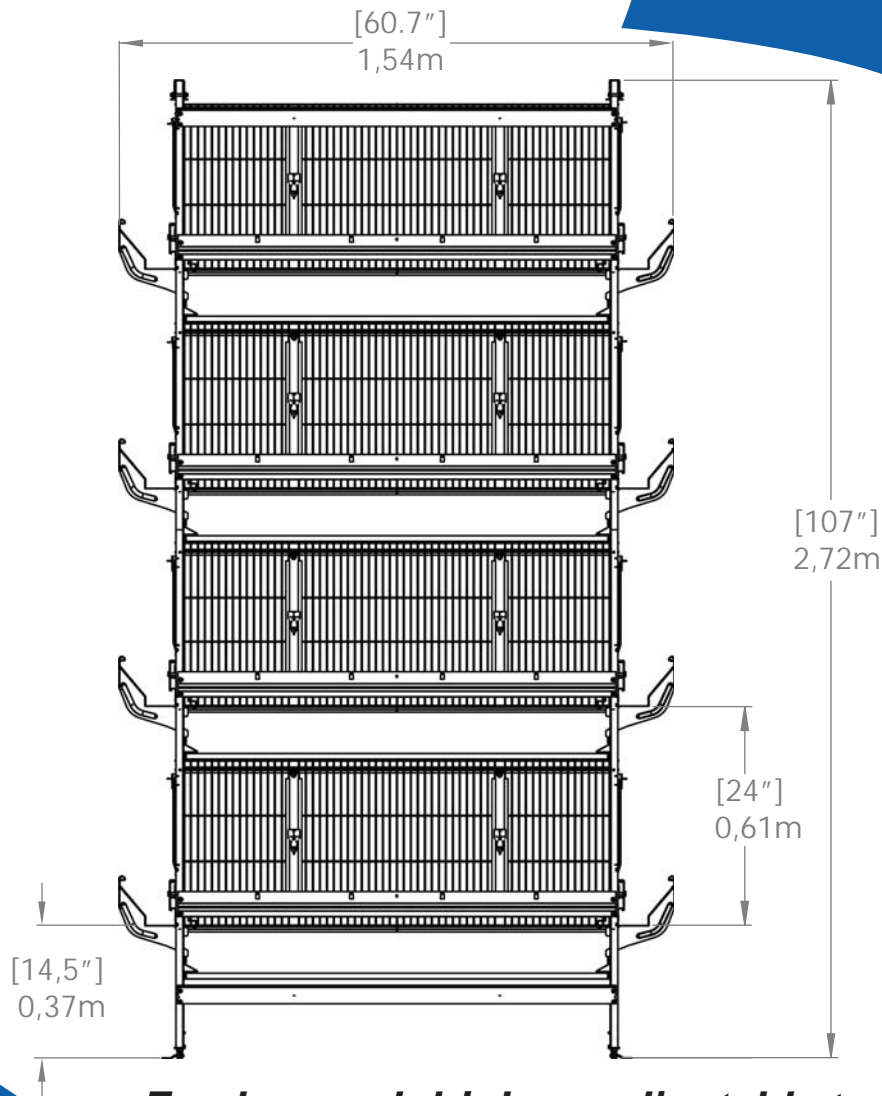

- With a **J-lock nipple design** and round tubes of $\frac{3}{4}$ " in diameter.
- Filter, medicator and water meter assembled per row, enabling more control of the flow of water to the layers.
- **Flex500 Independent Feed Filling System** of 5" in diameter. (Exclusive to Alaso)
- Available with **Flat Chain Feeding System** or **Traveling Hopper Feeding System**.
- The Traveling Hopper Feeding System offers **lower power consumption** and requires less maintenance.
