

Competitive Advantages

- **Modular System** that facilitates the assembly process.
- Designed with greater height for **better ventilation**.
- Structural support every 2' (0.60mt).
- Feeder troughs manufactured with Galvanized Steel GA20.
- **Reinforced trough supports** every 2' (0.60mt) on every tier.
- With **wire cage partitions** that allow **air to flow freely** throughout the house without obstructions.
- All cage floors are manufactured with 2.11mm wire, a diameter **3% larger**.
- With a **J-lock nipple design** and round tubes of 3/4" in diameter.
- Filter, medicator and water meter assembled per row.
- **Flex500 Independent Feed Filling System** of 5" in diameter. (Exclusive to Alaso)
- All power units are direct drive "**coupled motors and gearboxes**", without belts or need for maintenance.
- Available with **Flat Chain Feeding System** or **Traveling Hopper Feeding System**.
- The Traveling Hopper Feeding System offers **lower power consumption** and requires less maintenance.
